

# If A Farmer Gets A Pickup – Matching Game

With a parent or another responsible adult's help, carefully cut out each 2" X 2" square game piece. Then find a flat surface such as a table, mix up the cards and spread them out face down. Flip one card over then guess where the match might be and flip that card over. If you found a match you get to keep those cards, if they are not a match flip the cards back over and let the next person try. Keep taking turns until all matches have been found. The person with the most matches wins the game!
